

Southern Tablelands Ecosystems Park

A Regional Botanic Garden for the
Southern Tablelands at Forest 20 at
the National Arboretum Canberra

Of Interest at Forest 20, June 2018

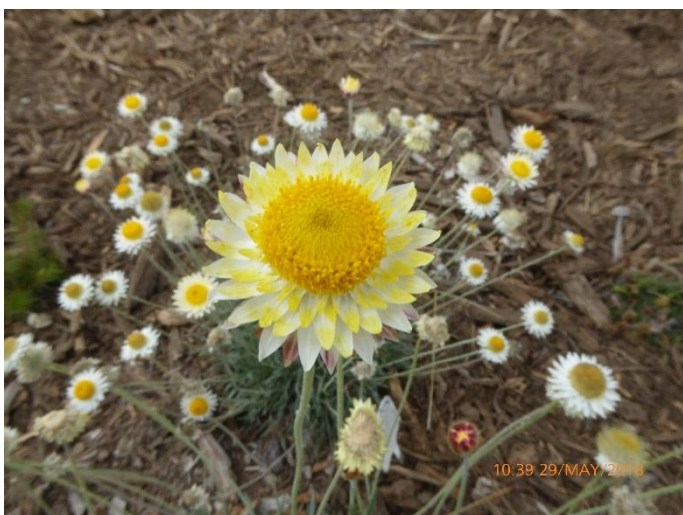

Number 37

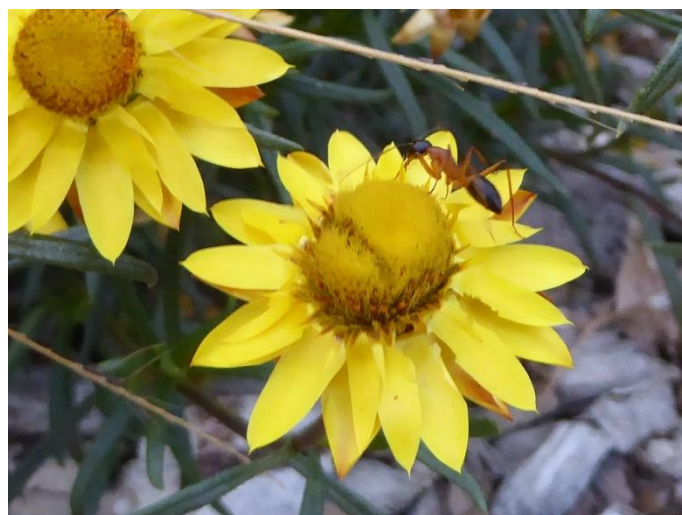

Platycercus eximius, Eastern Rosella and himself. A common local species that often feeds on grass seeds.

Platycercus elegans Crimson Rosella. Feeding in a clump of *Grevillea iaspicula* Wee Jasper Grevillea.

Leucochrysum albicans, Hoary Sunray. A long flowering local daisy. Grows well with a gravel mulch.

Xerochrysum viscosum, Sticky Everlasting with an unidentified ant. A hardy perennial local daisy.

Grevillea iaspicula, Wee Jasper Grevillea. A tall shrub that is endangered in its natural setting.

Brachyscome graminea, Grass Daisy. A hardy summer and autumn flowering perennial daisy.

Grevillea lanigera, Woolley Grevillea, so called for its hairy branchlets and leaves. A woodland species.

Podolepis jaceoides, Showy Copper-wire Daisy. Has been flowering for 6 months, must end soon.

Calotis glandulosa, Mauve Burr-daisy. A perennial daisy with spiny seeds. A vulnerable species in NSW.

Brachyscome dentata, Lobe-seed Daisy. Another perennial daisy found over most of NSW.

Acacia genistifolia, Spreading or Early Wattle. Can flower from late autumn to early spring.

Manorina melanocephala, Noisy Miner. A common bird of the honeyeater family known for aggressive behaviour to other birds.

Our working bees are held every Thursday morning from 8am, please feel free to join our friendly group at whatever time you able to. We break for morning tea at 10 am at the table near our shed. An excellent morning tea is guaranteed.
