

Southern Tablelands Ecosystems Park

A Regional Botanic Garden for the
Southern Tablelands at Forest 20 at
the National Arboretum Canberra

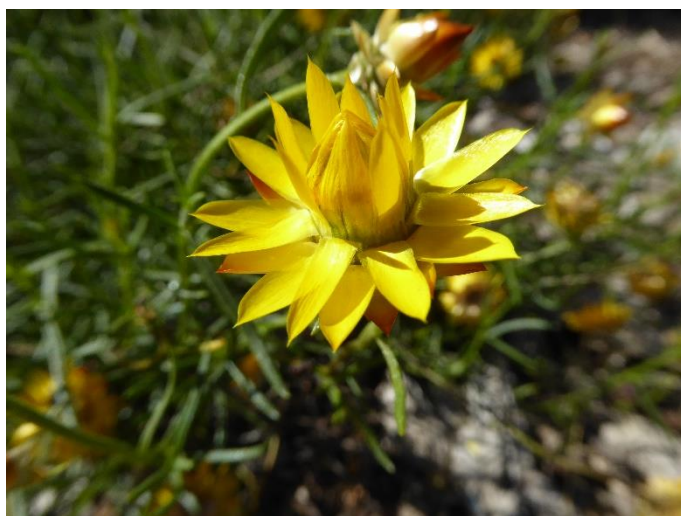

Of Interest at Forest 20, April 2018

Number 35

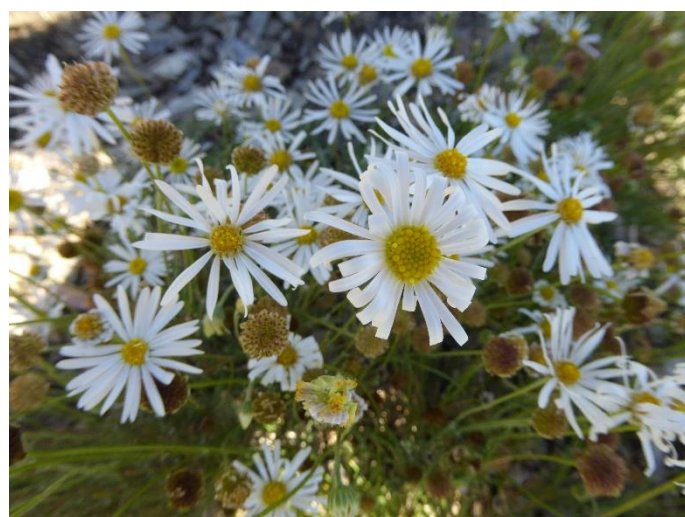

Brachyscome graminea, Grass Daisy. A hardy low growing summer and autumn flowering perennial.

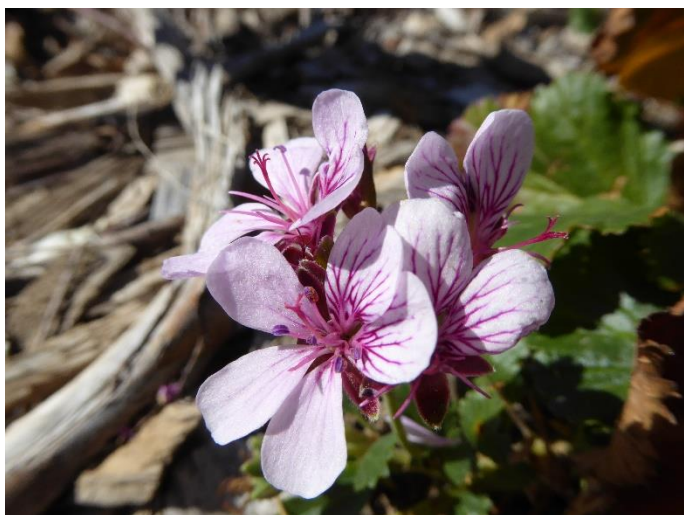

Xerochrysum viscosum, Sticky Everlasting. A hardy and common local everlasting daisy.

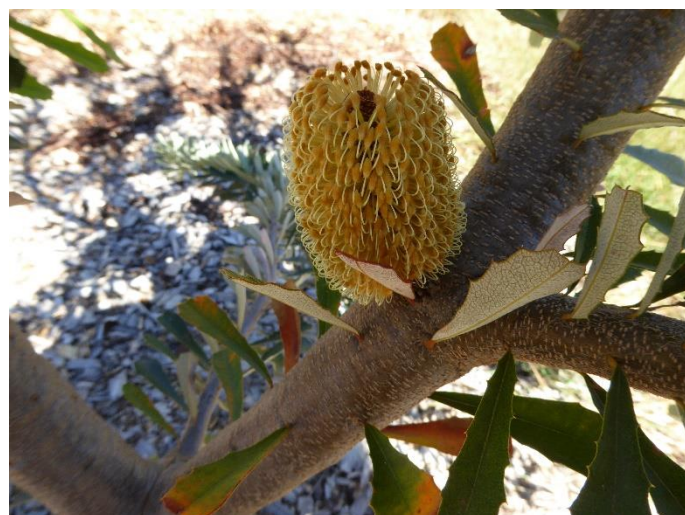

Podolepis jaceoides, Showy Copper-wire Daisy. An attractive daisy which renews from the rootstock.

Brachyscome dentata, Lobe-seed Daisy. Another perennial daisy found over most of NSW.

Pelargonium australe, Native Pelargonium. A member of the *Geraniaceae* family. Photo for 4th month in row.

Banksia marginata, Silver Banksia. Varies in its range over south eastern Australia from 12m tree to a shrub

Austrostipa verticillata, Slender Bamboo Grass. One of the less common grasses of our region.

Leucochrysum albicans, Hoary Sunray. Long flowering local perennial daisy. Likes to grow in gravel.

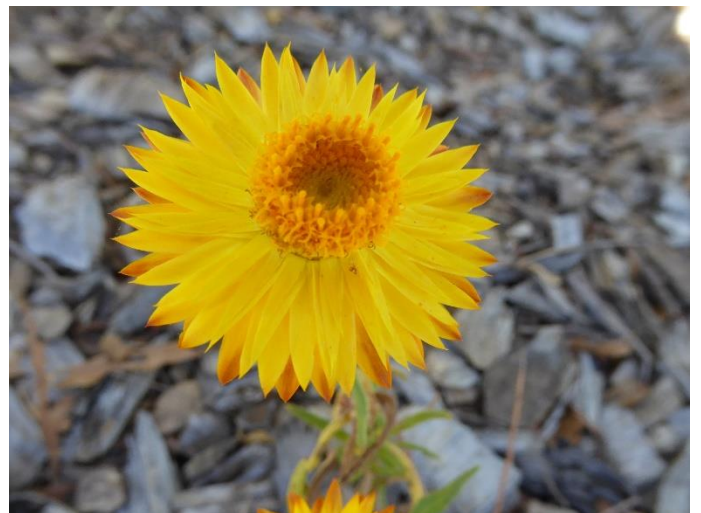

Ammobium alatum, Winged Everlasting. A hardy perennial daisy that may be considered weedy.

Coronidium gunnianum, Pale Everlasting. A hardy everlasting daisy. Was called *Helichrysum rutidolepis*.

Allocasuarina nana, Dwarf She-oak. Male and female are separate shrubs. Found in exposed heathlands.

Xerochrysum bracteatum, Golden Everlasting. An attractive though short-lived daisy.

Our working bees are held every Thursday morning from 8am, please feel free to join our friendly group at whatever time you are able to. We break for morning tea at 10 am at the table near our shed. An excellent morning tea is guaranteed.
