

Southern Tablelands Ecosystems Park

A Regional Botanic Garden for the
Southern Tablelands at Forest 20 at
the National Arboretum Canberra

Of Interest at Forest 20, August 2018

Number 39

Leucochrysum albicans, Hoary Sunray. A long flowering local perennial daisy. Persists well in gravel.

Olearia microphylla, Small-leaved Daisy-bush. An early flowering for this plant.

Various eucalypt species. The whole site is looking very dry.

Another general view of Forest 20. Some understory in the foreground, looking towards Mount Painter.

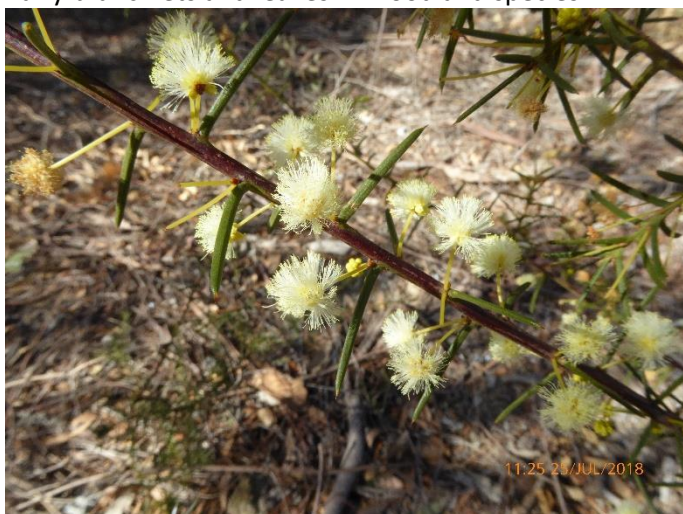

Grevillea iaspicula, Wee Jasper Grevillea. A tall shrub that is endangered in its natural setting.

Cracticus tibicens, Australian Magpie. Resident at Forest 20, the Black-backed race of the Magpie.

Grevillea lanigera, Woolly Grevillea. Named for its hairy branchlets and leaves. A woodland species.

Acacia genistifolia, Early Wattle. Well known for its winter flowering. It has very spiky phyllodes.

Xerochrysum viscosum, Sticky Everlasting. A hardy perennial daisy now looking like a dried arrangement.

Our working bees are held every Thursday morning from 8am, please feel free to join our friendly group at whatever time you are able to. We break for morning tea at 10 am at the table near our shed. An excellent morning tea is guaranteed. Park on lower section of overflow carpark where you will see a line of vehicles.

Eucalyptus pauciflora, Snow Gum. A smooth barked eucalypt that grows in frost hollows locally.

Eucalyptus macrorhyncha, Red Stringybark. Shows a heavy load of fruit developed from strong flowering.

Dianella longifolia, Pale Flax-lily. Planted in the new Bush Tucker Garden, these are looking well despite the dry conditions.
