

**Southern Tablelands Ecosystems
Park A Regional Botanic Garden for
the Southern Tablelands at Forest 20
at the National Arboretum Canberra**

Of Interest at Forest 20, February 2020 Number 58

Podolepis jaceoides, Showy Copper-wire Daisy. An attractive long flowering daisy.

Pelargonium australe, Native Pelargonium. A hardy long-flowering member of the *Geraniaceae* family.

Rytidosperma bipartitum, Leafy Wallaby Grass. A late head on this open woodland grass species.

Calocephalus citreus, Lemon Beauty-heads. A late flowering member of the daisy family.

Xerochrysum viscosum, Sticky Everlasting. A hardy long-flowering local daisy. Cut back old growth after winter when new growth comes.

Chrysocephalum apiculatum, Common Everlasting. A hardy local perennial daisy with multiple forms.

Eryngium ovinum, Blue Devil. These are still putting on a good show near the main entrance to Forest 20.

Crowea exalata Ginninderra Falls, Small Crowea. A long flowering local plant though few flowers now.

A new collection of rocks for use at Forest twenty.

Working bees are held every Thursday morning from 8am, feel free to join our friendly group at whatever time you are able. We break for morning tea at 10 am at the table near our shed. An excellent BYO morning tea is guaranteed. The grass car park is now fenced off as a construction site so we will now have to use the main car park.

Dianella Sp. A Flax Lily. This planting within the Bush Tucker Garden is showing the benefit of a raised bed.

Ammobium alatum, Winged Everlasting. A perennial daisy that reseeds readily. Can be considered weedy.

Geranium solanderi var *solanderi*, Austral Cranesbill. A volunteer native species.

These photos were taken by Andy Russell on Monday February the 4th 2020. The postal address for STEP is PO Box 440, Jamison Centre, ACT 2614.
